

## Tata Projects: EHS awards

Excellence in industrial safety, health, and environmental stewardship is more than a policy at Tata Projects – it's a fundamental value. This steadfast commitment earned the company an outstanding collection of awards in FY2024, affirming its leadership in the field. With a flawless record in securing eminent industrial Environment, Health and Safety (EHS) awards, Tata Projects is delighted to present its journey and the strategies that led to this extraordinary accomplishment.

## A Year of Distinguished Honours

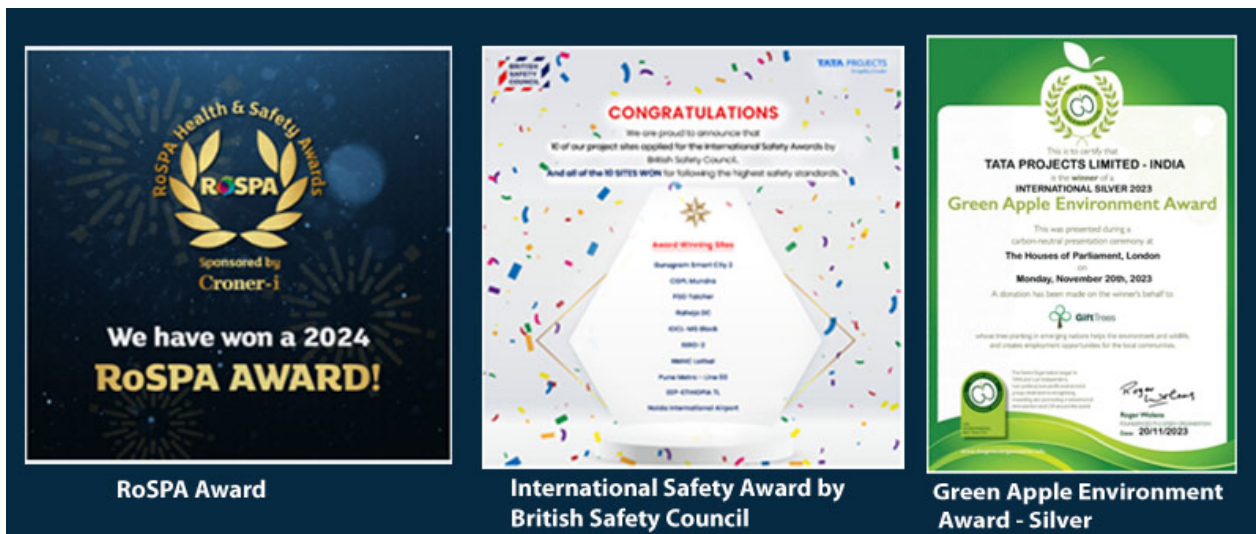

The company's success is underscored by the prestigious awards it have received, both internationally and nationally. These accolades include:

### International Awards

- **The Royal Society for the Prevention of Accidents (RoSPA) Award:** Honouring its unwavering commitment to protecting lives
- **International Safety Award by the British Safety Council:** Recognising excellent standards of health, safety and wellbeing
- **Green Apple Award by the Green Organisation:** Celebrating environmental initiatives and compliance

### National/Regional Awards

- **National Safety Council, India (NSCI) Award (National level & Tamil Nadu chapter):** For exemplary Occupational Safety & Health (OSH) performance
- **CII Award** (National level, Western region & Southern region): For excellence in Health, Safety and Environment (HSE)
- **FICCI Award:** For commitment to safety systems at the workplace
- **Vishwakarma Award by CIDC:** For construction safety and green initiatives
- **Silver Trophy by World Safety Organisation:** For workplace OHSE excellence

## The Impact of Achievements in the Industry

By securing these esteemed awards, Tata Projects showcased its dedication to EHS excellence, influencing the industry's EHS culture. The success set a standard, encouraging others to embrace safety and environmental best practices. EHS efforts also bolstered its standing as a trustworthy industry partner, while the feedback from the awards provided insights for ongoing enhancement and innovation. These accolades are a catalyst for the company's future aspirations in EHS excellence.

## Journey to Success

By winning every award applied for, Tata Projects achieved a 100% success rate in FY2024, up from approximately 90% in FY2023. This is a testament of its strategic and systematic approach. The company employed the DMAIC framework – Define, Measure, Analyse, Improve, Control – a methodology rooted in Six Sigma principles, to streamline its efforts and ensure continuous improvement.

Tata Projects transitioned from a fragmented, site-specific approach to a centralised, strategic process in FY2023. It reduced the number of award categories to three, carefully mapping over 200 projects to these categories to align with its intrinsic values. By engaging leadership at every step, from application to assessment, and centralising the control of the process, the company ensured consistent, high-quality submissions that highlighted its strengths. This methodical approach not only addressed past inefficiencies but also fostered a culture of excellence and accountability throughout the organisation.

In qualitative terms, too, the performance in FY2024 improved by enhancing focus on top-tier national and international awards, and by selecting sites based on rigorous evaluation criteria.
